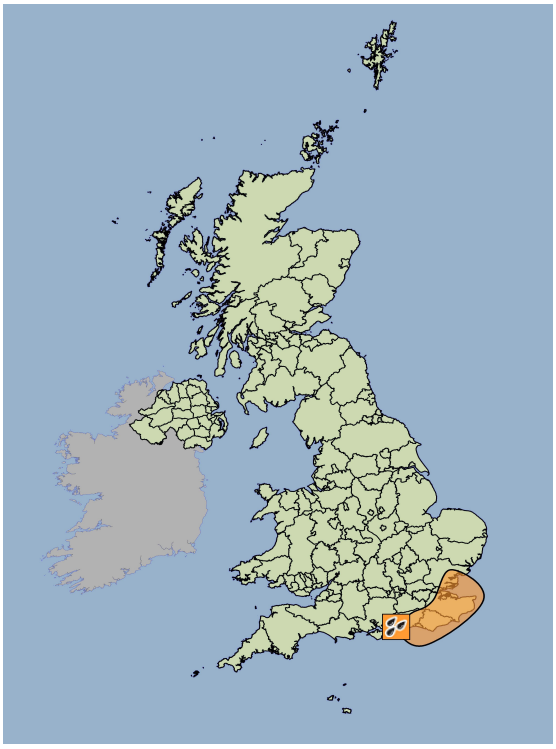
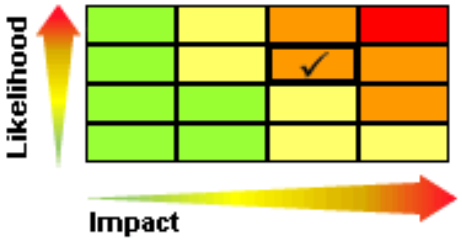
National Severe Weather Warning Service





Chief Forecasters Assessment
Another pulse of thundery activity from France will extend across the area this afternoon and evening. The ground remains saturated from earlier heavy rain, and the high water loading in the atmosphere means that more than 30 mm in an hour or less could well occur locally.

The Met Office have issued an **Amber Warning** of **Rain**

Valid from **16:00 on Thu, 13th Aug 2015** until **21:00 on Thu, 13th Aug 2015**

After very heavy downpours this morning, a second cluster of torrential, thundery downpours is expected to move north across the area from late afternoon. The public should be prepared for the risk of flooding of roads and properties.
